It is the goal of Capo Beach Church Preschool to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to:

Keep pests out by sealing up holes and cracks in doors, walls, floors, and ceiling.  
Eliminating food and water around building and in classrooms. Clean, sanitize and disinfect classroom surfaces and floors and bathrooms and as a last resort call pest control agencies.
